-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Response to Amendment

Applicant's amendment, which added to independent claims subject matter that was previously indicated as being allowable, overcomes the outstanding rejection; however, upon further consideration, new grounds of rejection have been made as set forth below. Accordingly, the finality of the last action is withdrawn.

Oath/Declaration

The supplemental oath filed on 21 September 2007 is accepted.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 and 5-55 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-13 and 24-40 of copending Application No. 11/112,586. Although the conflicting claims are not identical, they are not patentably distinct from each other because the differences effectively amount to minor differences in wording and/or obvious structural variations. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 5-55 are rejected under 35 U.S.C. 102(e) as being anticipated by Zubok et al. (U.S. Publication No. 2004/0225295; cited by Applicant).

Zubok et al. discloses the claimed device for implanting artificial intervertebral discs including a housing 5200 coupled to opposing guide members 5100, a spreader 4040, and a drive member 4000. The guide members are pivotally joined (¶ 49) and have an outer surface 5140 and a guide surface 5118, a slot 5150 extending therebetween and opening at a distal end with distal ends 5120 being positionable in

the space between vertebrae. The spreader 4040 is inserted between the guide members 5100 (¶ 52), has a central body and a pair of opposite wings 4202 extending therefrom and is accommodated by slot 5150 on the opposing guide members. The drive member is coupled to spreader 4040 and is used to forwardly advance the spreader. The spreader also has an engaging member extending between the spreader 4040 and each of the plate members of the implant.

Conclusion

The prior art made of record by Applicant and not relied upon is considered pertinent to applicant's disclosure. For example, EP 1 323 396 A3 (cited by Applicant), e.g., Fig. 16, is relevant to at least independent claim 20.
